                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     RES. 8:11-22(2001).

RES. 8:11-22(2001).

FUNCTION: CATALYZES THE PHOSPHORYLATION OF THE POSITION 2 HYDROXY GROUP OF 4-DIPHOSPHOCYTIDYL-2C-METHYL-D-ERYTHRITOL. PHOSPHORYLATES ISOPENTENL PHOSPHATE AT LOW RATES. ALSO ACTS ON ISOPENTENOL, AND, MUCH LESS EFFICIENTLY, DIMETHYLALLYL ALCOHOL. DIMETHYLALLYL MONOPHOSPHATE DOES NOT SERVE AS A SUBSTRATE.

MONOPHOSPHATE DOES NOT SERVE AS A SUBSTRATE.

CATALYTIC ACTIVITY: ATP + 4-(cytidine 5'-diphospho)-2-C-methyl-perythritol = ADP + 2-phospho-4-(cytidine 5'-diphospho-4-(cytidine 5'-diphosp
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  monophosphate kinase.
